

Close the deal on higher profits with **Inline Packaging Automation Solutions**

Inline Plastics is the only thermoformed container manufacturer in the industry providing in-house packaging automation solutions.

Automation Capabilities Include:

We have dedicated over 50 years to packaging innovations. Fully understanding how our customers can benefit from using our automation services quickly became the key input into our development processes.

The Inline Automation team leaves no stone unturned to ensure a reliable and effective automation integration process.

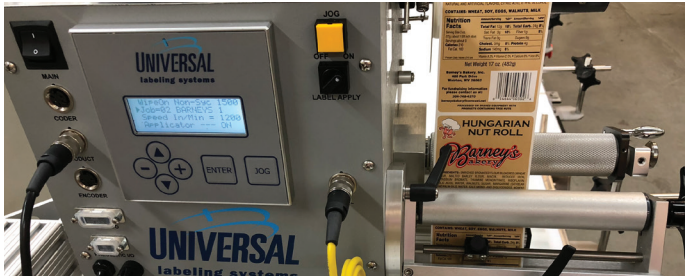

The results translate to a better value proposition for your customers to increase potential new sales. Typically, there is no need for tool change-overs — a simple adjustment of machine settings is all that's necessary.

Machines can be used alone or integrated easily to a packing conveyor or labeler.

Labeling Systems

Our innovative integrated systems will apply a wrapped label to the front edge of the top or the bottom of our PET clamshell containers. Either way, it's tamper evident and secure.

High Speed Closers

Container closing equipment is available for all Inline clamshell containers; closing at rates up to 200 units per minute or more. Change over from one size container to the next takes only minutes.

De-Nesters

Inline equipment is designed to pick and place empty containers onto a packing conveyor quickly, accurately, and efficiently.

Conveyers

We can automate vibrating the containers to settle food; we can flip the container around onto its lid, or turn containers to the desired position for labeling or ink-jetting.

We design around existing equipment or develop an entire line.
