Kosher Statement

Inline Plastics Corp. produces recyclable, single-use thermoformed plastic containers by heating and molding plastic sheets into a variety of shapes and sizes.

Inline Plastics Corp. requires that vendors supplying polyethylene terephthalate (PET) sheets provide **Kosher certification** for the material.

The PET plastic is processed in ovens at **500–600°F** and then molded and formed into containers. No additives, food ingredients, or animal products are used during the manufacturing process. No chemical synthesis is involved; the Kosher-certified plastic is simply reshaped into the final container.

Sincerely,

A handwritten signature in black ink that reads "Julie A. VanBennekum".

Julie VanBennekum
