

01 March 2024

Absence of Synthetics in our Product

Inline Plastics Corp.'s packaging products are manufactured from PET (Polyethylene Terephthalate) material and are suitable for direct food contact. The products are not treated with synthetic fungicides, fumigants, preservatives, or pesticides. No nanotechnology is used in the manufacturing of the products.

The products are 100% recyclable at curbside and can be recycled into new foodservice packaging. Inline Plastics Corp. designs its products to be suitable for their intended use as foodservice packaging, utilizing no more material than is required to render the product functional.

This declaration is continuing and shall remain in full force and effect until revoked in writing. This version supersedes all previous certificates that might otherwise be effective.

Sincerely,

A handwritten signature in blue ink, appearing to read 'M. Simmons', with a stylized flourish at the end.

Mark Simmons
Corporate Quality & Compliance Manager
