## **Security Policy/Product Defense**

Inline Plastics Corp. maintains a corporate site security and product defense plan designed to prevent product adulteration, including but not limited to sabotage or terrorist activities.

The product defense plan includes measures to secure each manufacturing site against unauthorized access, including:

- Locked external entry points and controlled badge access
- Verification of all deliveries and strict visitor policies
- Secure storage of all chemicals, accessible only to authorized personnel
- Use of tamper-evident seals on shipments of finished goods

Each Inline Plastics Corp. manufacturing site conducts an annual review and challenge of the product defense plan to ensure its continued effectiveness.

Customers are responsible for determining that the use of the product(s) is safe, lawful, and technically suitable for their intended applications.

This certificate is issued as a continuing statement and shall remain in effect until revoked in writing. This version supersedes all previously issued certificates.

Sincerely,

A handwritten signature in black ink, appearing to read 'Julie A. VanBennekom'.

Julie VanBennekom  
Corporate Quality and Compliance Manager  
Inline Plastics Corp.
